Please find the original document at <https://launchpad.support.sap.com/#/notes/2619515>

## Symptom

- Using Corporate Category Images in Fiorified BI Launchpad
- Default images are displayed for non-Administrators aside from the user that created the category
- Administrators can view the Images

## Other Terms

jpg, jpeg, img, picture, png, gif, svg default, bi4, fiori

## Reason and Prerequisites

### Environment

- SAP BusinessObjects Business Intelligence Platform 4.2 SP05+

### Steps to Reproduce

1. Create two non-administrator users (User1, User2) with rights to create categories
2. Create a corporate category in Fiorified BI Launchpad using User1
3. Add an image to be displayed to the category
4. Add a report to the category
5. Observe that the default image is replaced with the uploaded image
6. Log into Fiorified BI Launchpad using User2
7. Observe that the categories do not appear

### Cause

- The images are uploaded in a hidden folder located in the User's personal Folder.
- The default rights cause this to be hidden for all non-administrator users

### Solution

- The solution is currently under investigation by development

### Workaround

1. Create an enterprise user
2. Grant view access to the Everyone group on the user's personal folder, inherited by subobjects
3. Use the user to create corporate categories
