Please find the original document at <https://launchpad.support.sap.com/#/notes/2637136>

Symptom

For two users having access to the same corporate categories could not view the custom category image added by the other user.

Steps to reproduce:

1. Create two non-administrator users (User1, User2) with rights to create categories.
2. Create a corporate category in Fiorified BI Launchpad using User1.
3. Add an image to be displayed to the category.
4. Observe that the default image is replaced with the uploaded image (Fiori Home -> My Home -> All Categories)
5. Log into Fiorified BI Launchpad using User2
6. Observe that the categories do not have the uploaded image.

Other Terms

Custom category image, corporate category

Reason and Prerequisites

The images could not be accessed by the other user since the rights were restricted to the user who created the category.

Solution

The images are located at a shared location accessible by users having rights over the corporate category. The fix must reflect in 4.2 SP05 Patch 4 and 4.2 SP06 and all subsequent releases.
